
LANDSMART™ FOR VINEYARDS

REFERENCE GUIDE

Version 1.0
July 2014

Contents

Chapter 1: Introduction

- About LandSmart, RCDs and NRCS
- About vineyard conservation planning with LandSmart
- Benefits of LandSmart planning
- Basic watershed concepts
- Navigating the Permitting Process

Chapter 2: Property Description

- Map of major watersheds with tributary watershed names
- Finding your exact location in the watershed

Chapter 3: Vineyard Facility Map Summary

- Developing a Farm Map
- Land Measurements and Map Scale
- How to Create a Map of a Farm with a GPS

Chapter 4: Managing Agrichemicals

- Benefits and Potential Impacts of Pesticides
- Beneficial Management Practices for Agrichemicals
- Integrated Pest Management
- Management Practices for Treating Common Diseases/Pests
- Nutrient Management and Compost

Chapter 5: Managing Erosion in Vineyard Blocks and Avenues

- Background: soil erosion, sedimentation and storm runoff from the vineyard
- Soil Quality: Tillage, Compaction, Organic Matter and Soil Health
- BMPs for erosion and runoff control around the vineyard

Chapter 6: Managing Natural Waterways, Ditches and Spillways

- Streams, Riparian Areas, Fish & Wildlife Information
- BMPs to protect waterways: Revegetation, Erosion Control, Instream Habitat Enhancement, Fish Barriers
- Pierce's Disease in Streamside Vineyards

Chapter 7: Roads and Crossings

- Stream Crossing and Road Surface Treatment Options

Chapter 8: Photo Monitoring

- Photo Monitoring for Better Land Use Planning and Assessment
